

VoicePing 3.0

Completely redesigned.

Rebuilt for faster, safer multilingual work.

A faster, smoother, and more secure experience for live translation, AI meeting intelligence, mobile transcription, and enterprise communication workflows.

02 / WHAT CHANGED IN 3.0

What changed in 3.0

VoicePing 3.0 brings a complete redesign across desktop, mobile, speed, security, and offline intelligence — making live multilingual communication faster, clearer, and easier to use.

1

Completely redesigned app UI/UX

Cleaner layouts and a more intuitive experience across desktop and mobile.

2

Smoother live translation experience

Clearer bilingual display and more seamless real-time communication.

3

Improved performance

A faster, more responsive experience during live meetings and events.

4

Stronger workspace security

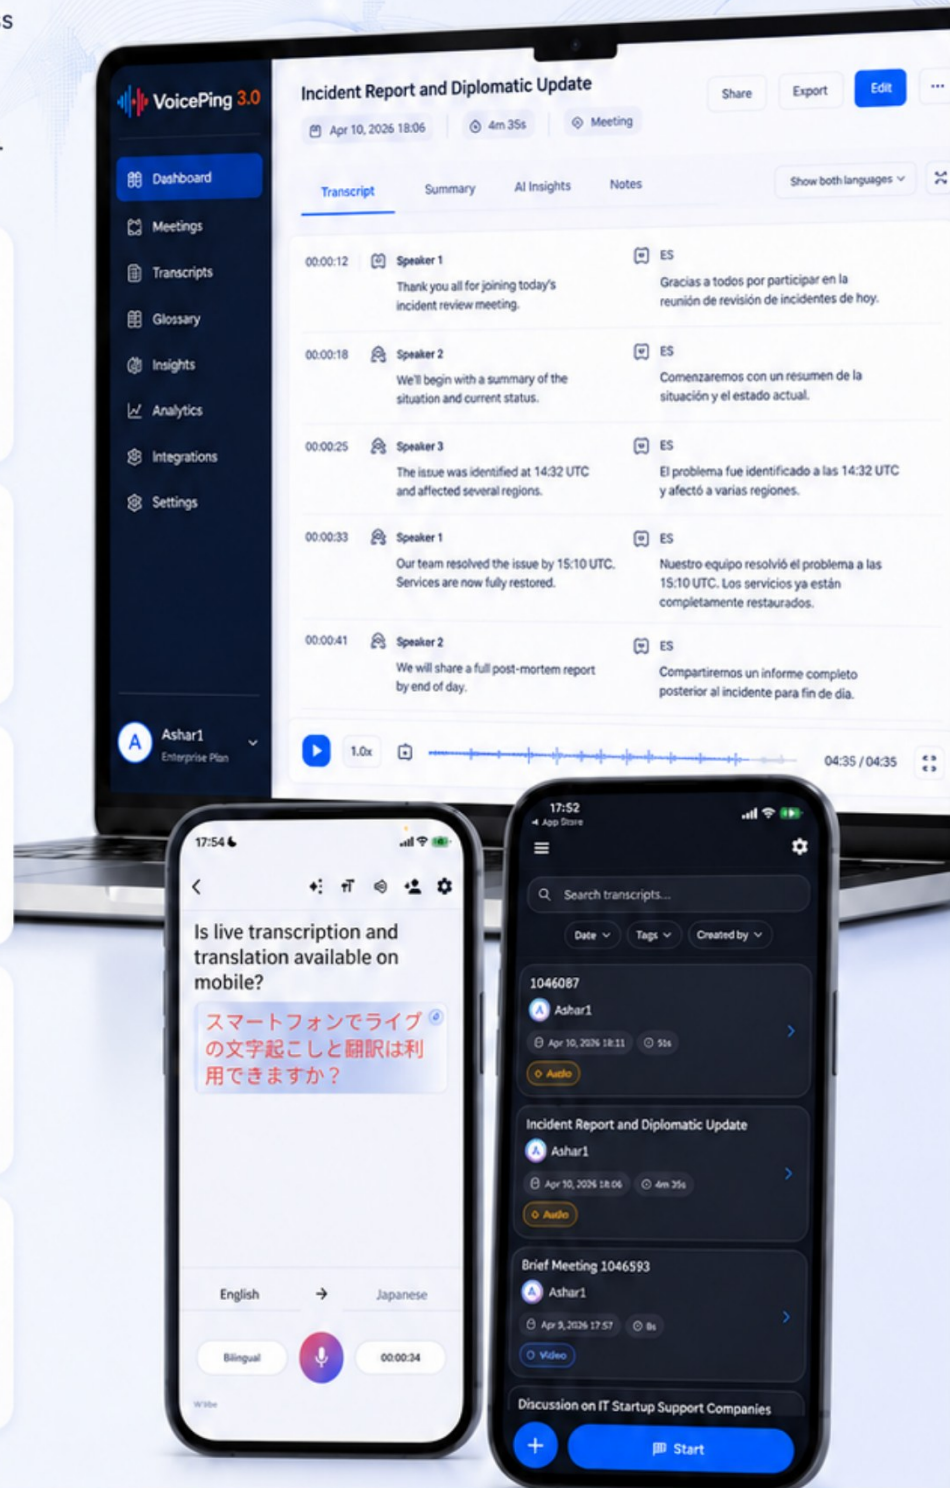

Better protection for enterprise teams, workspaces, and data.

5

Improved offline mobile transcript and translation models

Higher-quality offline transcription and translation on mobile.

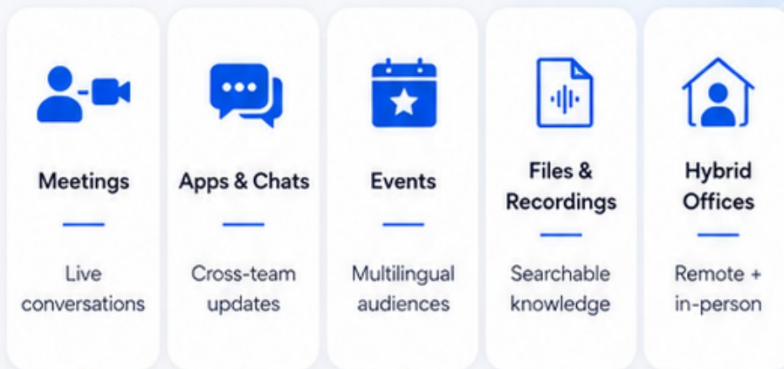

Why VoicePing 3.0

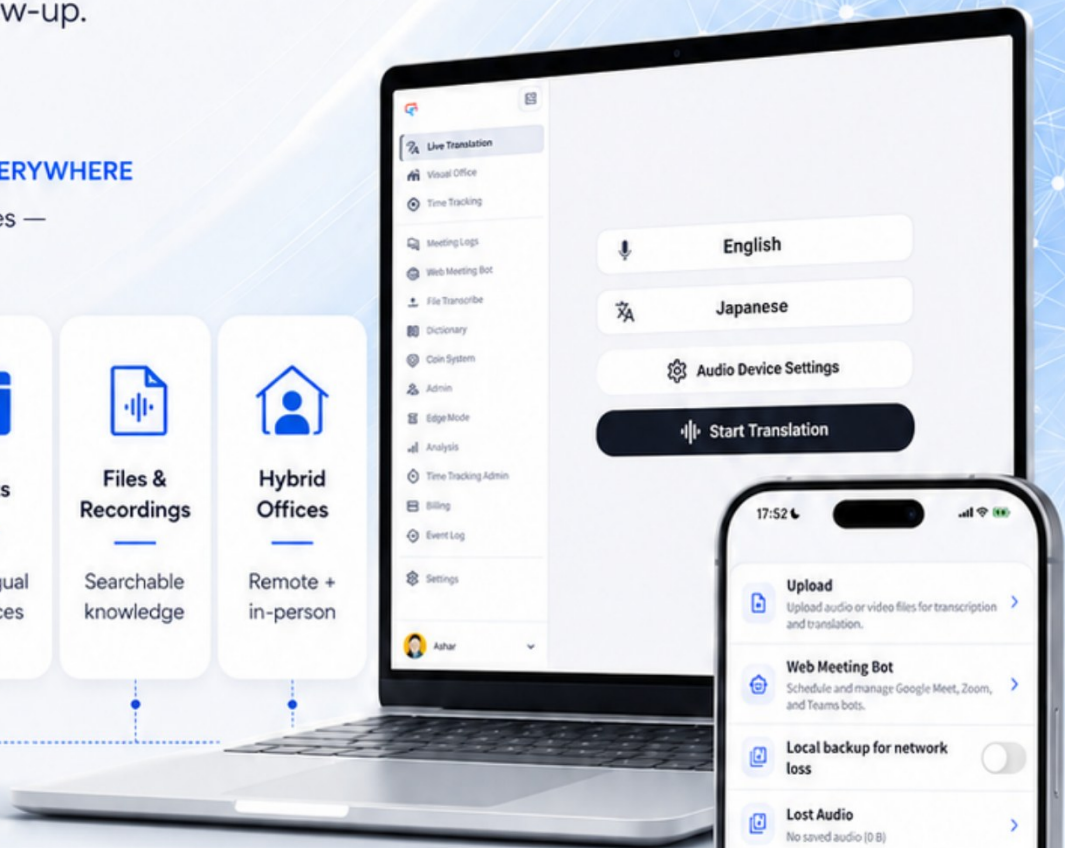

Global teams communicate across meetings, apps, events, files, and hybrid offices — but language barriers create lost context and slow follow-up.

COMMUNICATION HAPPENS EVERYWHERE

Your team connects in many places — and every moment matters.

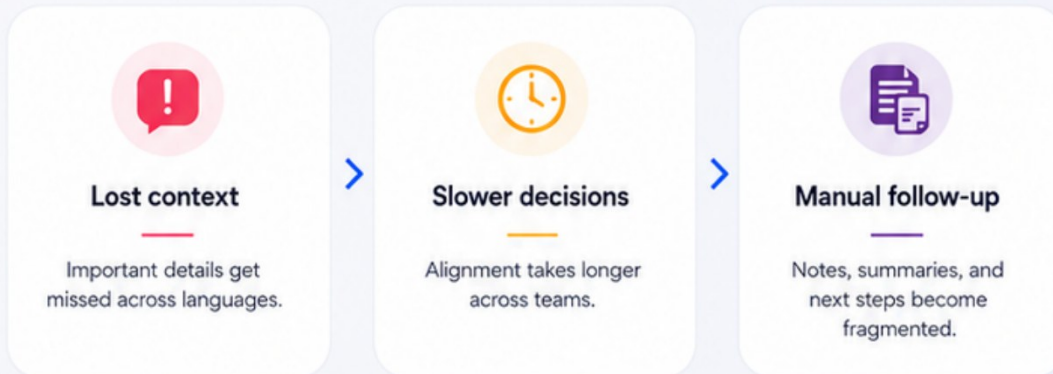

- Meetings**
Live conversations
- Apps & Chats**
Cross-team updates
- Events**
Multilingual audiences
- Files & Recordings**
Searchable knowledge
- Hybrid Offices**
Remote + in-person

THE REAL CHALLENGES

Without the right tools, communication friction costs time, clarity, and impact.

- Lost context**
Important details get missed across languages.
- Slower decisions**
Alignment takes longer across teams.
- Manual follow-up**
Notes, summaries, and next steps become fragmented.

VoicePing 3.0 helps global teams stay aligned in real time — **wherever communication happens.**

Trusted by enterprise teams for multilingual communication

VoicePing supports global teams across business meetings, events, education, manufacturing, remote work, and enterprise operations. It is built for organizations that need fast multilingual communication with searchable records, security controls, and scalable deployment.

 <p>100,000+ Users</p>	 <p>550M+ Seconds translated</p>	 <p>1M+ Meetings processed</p>	 <p>45 Languages supported</p>

VOICEPING 3.0
AI INTELLIGENCE STACK
 2026 PRODUCT RELEASE

The VoicePing Intelligence Stack

Built for **multilingual** business communication

Custom speech, translation, speaker, and meeting-intelligence models built for multilingual business communication.

MODEL LAYERS • CUSTOM AI CORE

- 01

SpeechCore ASR

Business-meeting speech recognition tuned for live conversations, calls, and recorded audio.

CUSTOM ASR MEETING AUDIO

High accuracy recognition even in noisy, real-world business meetings.
- 02

TranslateCore

Low-latency multilingual translation designed for fast bilingual and global team workflows.

LOW-LATENCY MULTILINGUAL

Fast, context-aware translations that keep conversations flowing.
- 03

SpeakerCore

Diarization across meetings and recordings, separating who spoke and when.

DIARIZATION RECORDINGS

Accurate speaker tracking for clearer insights and accountability.
- 04

VoicelD

Speaker embedding and identification for enrolled users across conversations.

EMBEDDING ENROLLMENT

Reliable identity verification to personalize and secure communication.
- 05

MeetingIQ

Summaries, topics, action items, and AI prompts that turn conversations into next steps.

SUMMARIES ACTION ITEMS

Smarter meetings with actionable outcomes and instant clarity.
- 06

EdgeCore Mobile

Offline mobile transcription and translation built for unstable connectivity.

OFFLINE MOBILE-FIRST

Stay productive anywhere with reliable offline capabilities.

From live audio to action-ready workflows

Capture

Recognize

Translate

Identify

Summarize

Act

Every step is powered by purpose-built AI models working together in one unified stack.

Live translation in every working mode

VoicePing translates microphone speech, system audio, presentations, mobile conversations, and external app audio in real time. Teams can switch display styles based on the meeting environment.

Bilingual Mode

Auto-detect both languages and generate transcript and translation without manual switching.

Side-by-side Mode

Useful for meetings, training, and bilingual review.

Vertical Split Mode

Readable bilingual display for large screens.

Inline Mode

Compact translation view for ongoing conversations.

Presentation Mode

Show translated captions for rooms and events.

QR Listener Access

Invite guests to view translation from their own phone.

Bilingual Mode

Show original speech and translated text together.

Side-by-side Mode

Useful for meetings, training, and bilingual review.

Vertical Split Mode

Readable bilingual display for large screens.

Inline Mode

Compact translation view for ongoing conversations.

Presentation Mode

Show translated captions for rooms and events.

QR Listener Access

Invite guests to view translation from their own phone.

Customer Highlights

Brave group

Before VoicePing, Korean-speaking members had to support real-time interpretation during meetings. VoicePing significantly reduced that interpretation workload.

Denka

Unlimited translation time made daily overseas communication easier across teams.

Try live translation with your team

INDUSTRY-LEADING ACCURACY

The lowest word error rate in its class.

VoicePing's speech recognition outperforms every major commercial API in measured WER tests for meeting audio — meaning fewer mistakes for your customers, your sales calls, and your internal records.

WER (Word Error Rate) measures the difference between transcript and ground-truth audio. **Lower is better.** Results measured on commercial-meeting audio across English and Japanese.

08 / MOBILE EXPERIENCE

Mobile translation that keeps working where teams actually communicate

VoicePing 3.0 improves mobile transcription and translation with smoother bilingual mode, playback controls, QR-based listener access, and enhanced offline model behavior for mobile transcript and translation workflows.

Work anywhere
Stay productive on the go.

Works offline
Reliable performance without internet.

Share instantly
Invite anyone with a QR code.

Offline ready
Keeps working when internet drops.

QR listener access
No app required.

Mobile bilingual mode
Live transcript and translation in a mobile-first interface.

Offline model improvement
Better mobile transcript and translation continuity when network conditions are unstable.

Playback controls
Review, replay, and manage translated audio and transcript sessions.

QR listener access
Share live translation access with guests and teammates without app setup.

Save and continue
End meetings cleanly and preserve records for follow-up.

Mobile settings
Configure language, audio, and app behavior directly from the phone.

Use VoicePing anywhere your team works [Try mobile translation →](#)

09 / MEETING LOGS

From meeting to knowledge.

Turn every recording into searchable transcripts, translations, summaries, topics, action items, and reusable AI prompts.

The screenshot shows a meeting log interface. On the left is a sidebar with navigation options: Live Translation, Virtual Office, Time Tracking, Meeting Logs (selected), Web Meeting Bot, File Transcribe, Dictionary, Case System, Admin, Edge Mode, Analysis, Time Tracking Admin, Billing, and Event Log. The main content area displays a meeting titled 'Development Updates and Action Items Discussion' from June 26, 2025. It includes a video player, a 'Recording file' section, and a 'TITLE AND SUMMARY' section with a detailed text summary. Below the summary are 'TOPICS' and 'ACTION ITEMS' sections. The topics list: 1. Staging Deployment Challenges, 2. Mobile App Enhancements, 3. Transcription and Gen Cancellation Issues, 4. Action Items and Next Steps. The action items are categorized by speaker: Speaker 3 (Prepare a staging logging with product updates, due by end of the week), Speaker 5 (Continue testing and fixing bugs in the mobile app, due by next meeting), Speaker 12 (Check and confirm the approval status of the apps, due before next deployment), and Mukajima (Share Edge mode feedback with the product team, due this week).

The screenshot shows the search interface. At the top, there's a search bar with the text 'Search meeting, phrase, or topics...'. Below it are filters for 'All', 'PC', 'Mobile', and 'Favorite'. There are also filters for date range (from 'Tom 2025/06' to 'Feb/20/2024') and 'Select tags...'. A list of search results is shown, including meetings like '全社会議の振り返り - VoicePing Support', '株式会社 新製品上場発表会 - VoicePing Support', 'VoicePing Statistics sess', and 'Discussion on Deployment and System Updates'.

Search every meeting
Filter by date, source, creator, or keyword to find the exact session fast.

The screenshot shows a transcript interface for a meeting titled 'Fed Meeting Insights on Inflation and Credit Risks' from May 21, 2025. It has tabs for 'Transcript', 'Summary', 'AI Insights', and 'Notes'. The transcript shows a list of audio segments with timestamps and play buttons. The first segment at 00:00 discusses the minutes of a Fed meeting and the possibility of a June rate increase. The second segment at 01:50 discusses the risk of the portfolio elevating later thinking high energy prices, high food prices, and the Fed's stance on inflation expectations. The third segment at 03:05 discusses the possibility of easing bias and participants' preferences for language.

Replay the important parts
Read summaries, browse topics, and tap audio segments row by row.

The screenshot shows the action items interface for the same meeting as the transcript. It features a 'TITLE AND SUMMARY' section, 'TOPICS', and 'ACTION ITEMS'. The action items are: 'Action Items for Speaker 3: Prepare a staging logging with product updates. (By end of the week)', 'Action Items for Speaker 5: Continue testing and fixing bugs in the mobile app. (By next meeting)', 'Action Items for Speaker 12: Check and confirm the approval status of the apps. (Before next deployment)', and 'Action Items for Mukajima: Share Edge mode feedback with the product team. (This week)'.

Capture next steps automatically
Action items and AI-ready meeting notes stay attached to the original session.

AI PROMPTS
Reuse meeting knowledge

Meeting Bot for Zoom, Google Meet, and Teams

VoicePing Meeting Bot joins external meetings, records audio and video, generates transcripts and translations, and turns meeting content into summaries, topics, action items, and searchable logs.

Schedule meeting bots
Add Zoom, Google Meet, or Teams links.

Calendar-ready workflow
Use Google Calendar, Outlook, and Slack integrations.

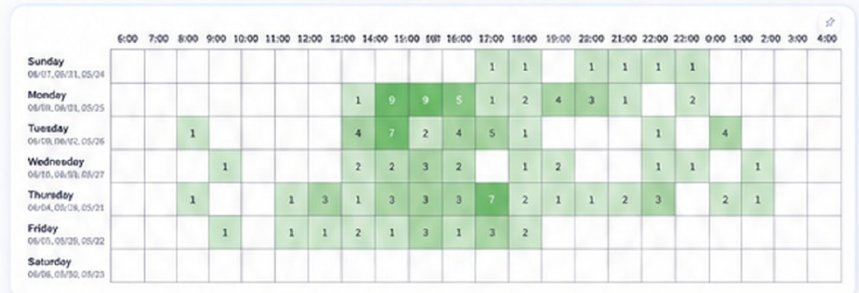

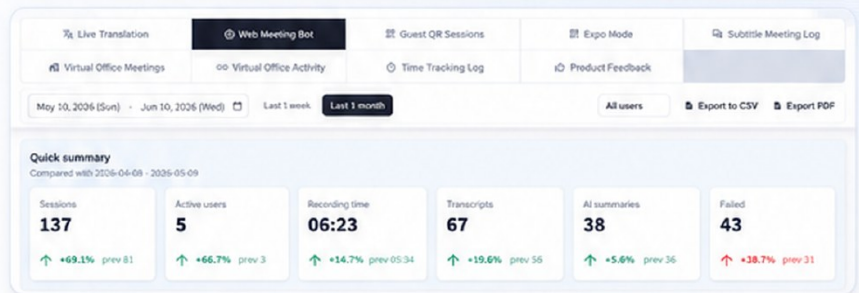

Automatic meeting records
Capture recordings, transcripts, and translations.

AI meeting outputs
Generate summaries, topics, and action items.

Analytics
Track bot sessions, recording time, transcripts, summaries, and failures.

Uses transcription and AI meeting minutes as a core workflow for multilingual business communication.

Automate external meeting records

[Book demo](#) →

Turn files into transcripts, subtitles, and dubbed content

Upload audio or video files to create transcripts, translations, subtitles, subtitled videos, dubbed audio, and searchable meeting-log style records.

GMO
RESEARCH & AI

“ Participant feedback showed subtitle-based multilingual support could cover future event needs, with only a small number of respondents requiring human interpreters.

Multilingual events without interpreter bottlenecks

VoicePing Expo Mode and Listener Mode give attendees instant access to live translation through QR codes. Guests can join without signup and choose their preferred language from their own phone.

QR entrance

Publish one event access URL.

No signup for guests

Attendees scan and listen instantly.

Per-listener language choice

Each participant selects their preferred language.

Event analytics

Track sessions, joined users, STT usage, duration, and language demand.

CSV export

Download event data for reporting.

Event Proof Highlights

“ Plug and Play Japan

VoicePing supported recurring 100–150 person events and a 2,200-person summit.

“ Mint and Print International Conference

Used VoicePing for a 200-person international conference with participants from 50+ central banks.

“ Nostrasia

Needed multilingual access across Japanese, English, Chinese, and Spanish for 700 participants.

“ Kushiro Hokuyo High School

Preferred VoicePing over traditional interpretation because interpreter delay would reduce event unity and increase total event time.

Use VoicePing at your next seminar or expo

ROI CALCULATOR (Example)

Example scenario:
20 hours of multilingual meetings per month

Remote interpretation benchmark:
\$1.50-\$4.00 per minute

Estimated monthly interpretation benchmark: **\$1,800-\$4,800** per month

In-person interpreter benchmark:
\$80-\$160 per hour, often with a two-hour minimum

Two-interpreter simultaneous meeting scenario: 20 hours × 2 interpreters × **\$80-\$160/hour = \$3,200-\$6,400** per month

VoicePing value

- ✓ Lower recurring interpretation dependency
- ✓ Searchable meeting records
- ✓ Reduced manual note-taking
- ✓ Reusable transcripts and translations
- ✓ Faster multilingual follow-up

Cost-Efficiency Proof

1 Denka

Selected VoicePing partly for cost performance and later expanded usage company-wide.

2 GMO RESEARCH & AI

VoicePing met budget and accuracy needs where other subtitle/translation tools did not.

3 MINT AND PRINT INTERNATIONAL CONFERENCE

Chose VoicePing because pricing was reasonable and within budget for a 200-person international event.

4 NOSTRASIA

Other services exceeded budget or did not meet multilingual requirements; VoicePing supported QR-based access for 700 participants.

5 PLUGANDPLAY JAPAN

Reduced event operation time and resources while supporting frequent events and a 2,200-person summit.

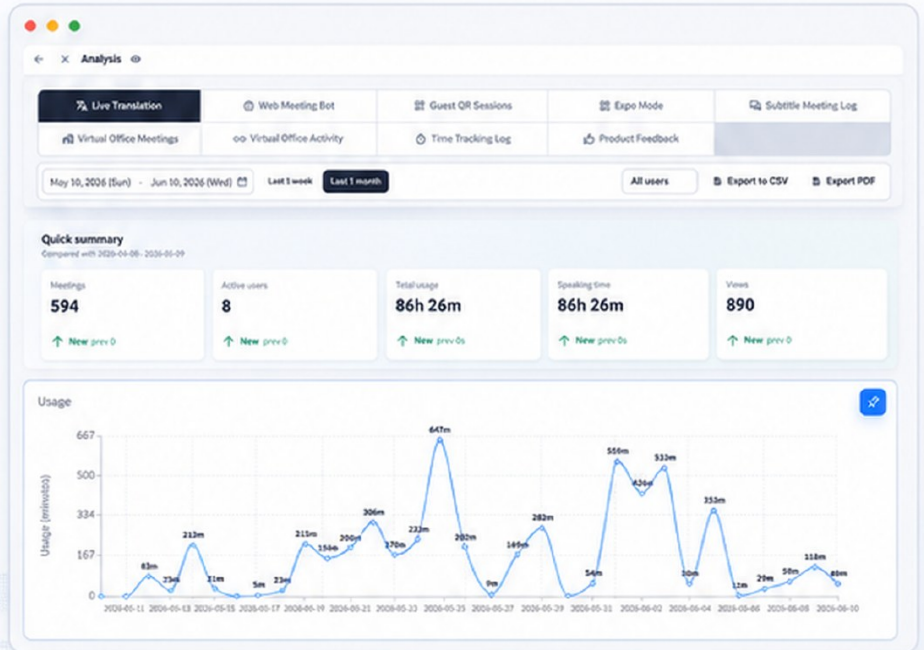

Calculate your multilingual communication ROI

Contact sales

- Public case studies do not publish exact savings percentages. ROI is shown through reduced interpreter dependency, lower event operation effort, and scalable multilingual access.
- Cost benchmarks use public interpretation pricing references: UW-Madison Language Access budgeting guidance (\$80-\$160/hr), Timekettle interpreting cost guide (\$1.50-\$4.00/min remote interpretation), and DC Office of Human Rights vendor reference (\$145-\$175/hr in-person, \$2.50-\$3.00/min phone interpretation). Actual savings vary by usage, language, workflow, and plan.

Continuously improved for enterprise teams

VoicePing is not a one-time tool. It is backed by an active engineering and research team that continuously improves app experience, speech models, translation quality, mobile reliability, analytics, security controls, and enterprise workflows.

Roadmap toward a complete multilingual work platform

VoicePing continues to expand from live translation into a full multilingual work platform for communication, analytics, automation, knowledge, and enterprise operations.

Topic Co...

00:00:00 - 00:00:02 Topic

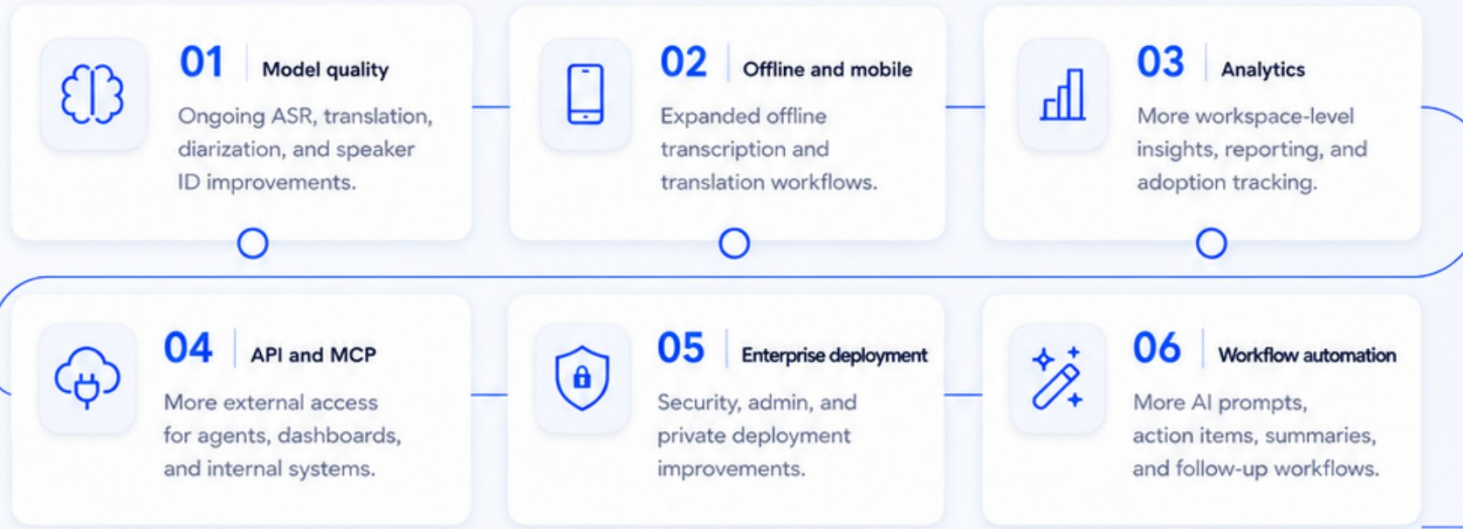

AIを最強の協働成長として

AIを単なるコパイロットとしてではなく、あらゆるプロセスの基盤として活用することを強調し、すべてのステラファクトを対等パートナーとして記録することに重点を置いています。

The dashboard shows a 'Quick summary' with the following metrics:

- Meetings: 594
- Active users: 8
- Total usage: 86h 26m
- Speaking time: 86h 26m

The mobile app interface shows a question in Japanese: 'スマートフォンでライブの文字起こしと翻訳は利用できますか?' (Can I use live transcription and translation on my smartphone?). Below the question, it shows a language selection from English to Japanese and a 'Bilingual' button.
